The Innovation Engine of India

**AcSIR**

# Join the **MASS SPECTROMETRY** *Lab*

## Ph.D. Research Opportunities-02 (January 2027)

Our laboratory offers an exciting research environment for motivated students who want to develop expertise in **mass spectrometry, molecular analysis, metabolomics, structural characterization, and advanced LC-MS/MS analytical techniques.**

Here, you will learn not only how to operate sophisticated instruments, but also how to ask important scientific questions, design experiments, interpret complex data, and **turn analytical results into publishable discoveries.**
